

Maine's possible future given the global climate crisis

Thursday, April 9 at 7:00 p.m.

Emera Astronomy Center

How fast can climate change? How is Arctic warming impacting Northern Hemisphere climate? What are the impacts of climate change today and what can we expect in the next few decades? Explore how Maine's citizens will be affected by the global climate and the unprecedented changes taking place in our environment. Join Dr. Paul A. Mayewski, Director of the Climate Change Institute and Distinguished Professor in the School of Earth and Climate Sciences at Umaine to explore how climate change will affect Maine and it's citizens.
